# ABOUT US

WhiteLint Global is a start-up focused on providing Network Security and Digital Forensics Solutions, and Training Consultancy to various agencies. The company is currently headquartered in New Delhi and provides services to offices, investigation agencies, law firms, and government outfits, etc.

Ours is a driven network security solutions company, aiming at providing state-of-the-art network and cyber security solutions for industries, offices, organizations, or individuals. Our organizations service works under distinct heads, namely: Technical Consultation; Training and Academic Consultation; Investigative Consultation and Unique Network Security and Forensic Solutions.

Our Technical Consultation Wing (R&D Services) are utilized by corporates, private laboratories and law enforcement agencies. Our services are utilized to design and implement smart and secure networks for these offices that are in possession of critical data. We can provide customized secure network set ups and exclusive red-hat hardened network set ups for guaranteeing data security to organizations carrying vital data that may be targeted by competition or malicious users. Our security frameworks revolve around a unique end-point security framework that has been indigenously conceived and developed in India, called WAFER. It is proprietary framework that performs complex Deep Packet Inspection- based content- based filtering of network packets in real time and provides state-of-the-art RT- mitigation and automated incident response. It has been rolled out currently as two products namely WAFER CHIP (1.0) and WAFER NOVA (2.1, 2.2, 2.x)- meant for dedicated markets.

Our Academic Consultation extends to private Universities willing to establish courses in forensic science amongst their faculties. Our services allow such Universities willing to establish infrastructure and hire UGC qualified faculty members suitable to conducting undergraduate and postgraduate courses in Forensic Science, Cyber Security, Digital Forensics, Information Security and Assurance, eDiscovery and Cyber Law.

Our Investigations Consultation wing involves investigation of breaches in security and theft of data and eventually money through online deceit. Victims of phishing, online frauds or even stalking don't always receive justice Police is not always able to delegate sufficient resources to solve such cases. In such scenarios our services ensure deliverance of justice through hi-tech investigation protocols. Our unique range of indigenously developed Network Security and Forensic Solutions, offer a range of enhanced cybercrime investigative capabilities to a user. Our services are available exclusively for law enforcement agencies and our unique tools will soon be made available as cloud-based services to these organizations. These licenses are extended to end users in combination with elaborate training sessions and with annual maintenance support.

# ABOUT CEO

Dr. Mohit Soni, a young dynamic, and renowned Network Security and Digital Forensic Expert is at the helm in this unique Make in India Start-Up (WhiteLint Global Pvt Ltd) that aims at providing solutions and consultancy to various governmental and non-governmental agencies. He has a long line of academic and training experience and achievements. He began his career in Research and Development and was awarded the prestigious research fellowship from the Directorate of Forensic Science, Ministry of Home Affairs in 2006 to conduct his Ph.D. in Information Security and Bio fairs in 2006 to conduct his Ph.D. in Information Security

Biometrics at the Indian Institute of Technology Kanpur, Kanpur in the same year. His doctorate in Computer Science was awarded from Abdul Kalam Technical University, Lucknow in 2013. He has done an M.Sc. in Forensic Science from LNJN National Institute of Criminology and Forensic Science, Ministry of Home Affairs, New Delhi, and an M.Tech (modular) in Computer Science from UPTU, Lucknow. Dr. Soni has served as a founding faculty for courses in Forensic Science at many private universities.
